

DIGIERRE 
DESIGN GROUP & RESEARCH

ELT the biggest optical telescope in the World
Atacama Desert - Chile – ESO courtesy

Our design group is specialized in mechanical and electrical engineering with expanding result across Italy and abroad. Our knowledge and expertise relate to many sectors including industrial, civil, tertiary and sanitary building service. Our dedicated teams are always personally directed by one of the company founders, each with many years of experience in design project management and construction.

Lighting
Safety and security
Special plants
Signal and data plants
Health and safety on site
BIM design*

STAFF

To satisfy the current high quality demands in our highly specialized field, it is important to gain the best-experienced people and to use their expertise and skills in the most productive way.

For this reason, our technical team is organized to satisfy several areas of work, in plant projects, construction management, and acceptance tests, with this basic structure:

HOME STAFF:

- 3 senior Consulting Mechanical engineers
- 1 senior Consulting Electrical engineer
- 4 projects leaders
- 2 BIM staff
- 4 junior plant designer
- 1 secretary
- on site staff on demand

The team is currently involved in the most important design and construction by primary companies, due to the wide experience acquired in more than 25 years of experience of the reference staff.

Due to the acquired knowledge, the mains are also involved in the italian engineers council and are contract teachers of Politecnico di Milano for plants design.

Our main staff structure can be easily increased using our usual consultants, to satisfy each specific project requirement, and to give our Clients the required flexibility with the best-cost efficiency they need.

All our designers and engineers use the latest industry related software and all our staff are officially recognized by Italian laws to work on safety projects (law 494) on fire fighting projects (law 818) and on energy control projects (law 192 – law 46).

PROJECTS

Our expertise is mainly orientated around civil, commercial and industrial buildings, which include:

- Clean rooms and contamination controlled areas
- Commercial and office buildings
- Field and mobile structures
- Hospitals and Hospices
- Laboratories and production buildings
- Museums, historical buildings and Churches
- Residential buildings
- Spectacle buildings, cinemas and theatres
- Transports, railway, Highways

Plants we have expertise in, are:

- HVAC plants, heating, cooling and air conditioning
- Potable, pure and wastewater in civil and industrial applications
- Sanitary plants
- Fire fighting plants, safety
- Electrical energy and lighting
- Road and tunnel ventilation and lighting
- Communication, phone and data transmission
- Building controls and automation
- TVCC, cameras, security
- Sound diffusion and Public Address
- Special plants

PROJECTS AND ENGINEERING

UNIVERSITY AND SCHOOLS:

University Offices Dei Caniana street -Bergamo
